

EDUCING INFORMATION

Interrogation: Science and Art
Foundations for the Future

Intelligence Science Board
Phase 1 Report

NATIONAL DEFENSE INTELLIGENCE COLLEGE

Resumo de Educating Information: Interrogation Science and Art

The Intelligence Science Board was chartered in August 2002 and advises the Office of the Director of National Intelligence and senior Intelligence Community leaders on emerging scientific and technical issues of special importance to the Intelligence Community.

The mission of the Board is to provide the Intelligence Community with outside expert advice and unconventional thinking, early notice of advances in science and technology, insight into new applications of existing technology, and special studies that require skills or organizational approaches not resident within the Intelligence Community.

"Educating information" refers to information elicitation and strategic debriefing as well as to interrogation. Educating Information is a profoundly important book because it offers both professionals and ordinary citizens a primer on the "science and art" of both interrogation and intelligence gathering.

It concludes with an annotated bibliography.
