PACIFY™

>> By Steven Perkins

Resumo de Pacify

A world-famous actor with a gigantic fly's head. A sexy product endorsement team with brown paper bags on their heads. A militant baglady. A tobacco/news/oil/fast food/entertainment/condiment mogul. What do they have in common?

They are all part of Steven Perkins' Pacify - a bold and bizarre absurdist satire of the complicated times we live in, taking dead aim on American pop culture with a biting wit and acidic art style.
